QR Code to Portfolio

Motivated École Polytechnique student (Mathematics & Computer Science) with strong foundations in optimization, probability, and algorithms. Experienced with deep learning and computer graphics, and eager to deepen my technical skills through advanced coursework and hands-on projects. Particularly interested in computer vision, graphics, and machine learning applications.

EDUCATION

École Polytechnique, Palaiseau, France — 2023–2026
Bachelor of Science, Dual major: Advanced Mathematics & Computer Science
GPA: 3.8/4.0

- Relevant courses: Optimization, Probability & Statistics, Machine Learning, Computer Architecture

Technical University of Denmark (DTU), Copenhagen — Spring 2025
Exchange Semester

- Courses: Rendering, Deep Learning, Operating Systems, Multivariate Statistics

PROFESSIONAL & RELATED EXPERIENCE

Bachelor Thesis Research (VISTA Group), Palaiseau — Jan–Mar 2026
École Polytechnique — Supervised by Marie-Paule Cani

- Designed a pipeline enabling LLMs to generate physics-aware 3D Unity scenes from natural language.
- Implemented automated C# script generation, reducing manual prototyping workload.

Environmental Sound Classification — 2024
École Polytechnique

- Built CNN models in Python for audio-event classification.

Chess Move Predictor — 2024
Personal Project

- Developed a C++ chess engine with optimized evaluation functions.
- Implemented prediction heuristics and search-tree pruning.

LANGUAGES

French (native), Arabic (native), English (C1–C2), Chinese (HSK2), German (A2–B1)

IT SKILLS

Programming: Python, C++, C, Java, JavaScript, MATLAB, R
ML: PyTorch, TensorFlow, Scikit-learn
Scientific computing: NumPy, Pandas, SciPy, Matplotlib
Tools: Git, Linux, Docker, LaTeX
Graphics & simulation: CUDA, Rendering, SDL2, Unity (C#),

INTERESTS

Piano & Music: 15+ years
Sports: Black belt in karate; Handball national champion with high school team; Volleyball
Volunteering: Tutored children with learning difficulties in an educational association
Video Games & Books: Interest in strategy, world-building, and science fiction
Programming & Tech: Enjoy building personal projects and exploring new technologies
